RGT Windozz
Recommended List 2018.

Variety Data: RGT WINDOZZ (E&W REGION)

VARIETY OVERVIEW:

RGT Windozz is the highest yielding hybrid on the East/West list, a fact that has not been lost on growers since the variety gained full recommendation on the 2016/17 list. Another key attribute is its vigour – it is one of the earliest varieties to get away in the spring and one of the earliest hybrids to mature. This, plus solid disease resistance to both light leaf spot and stem canker as well as short, stiff straw, offers reliability up to and through harvest.
